x1 €28.- x3 €67.- x5 €102.- x10 €185.-

## Cannabis Cultivation will never be the same

If you thought all cannabis hybrids are created equal, think again.

F1 hybrids are **the future of cannabis genetics**, offering **unrivalled stability, vigour, and yields**. Unlike regular hybrids, which can be created by crossing virtually any two cannabis plants, F1 hybrids are made by crossing **two pure (also known as “inbred”) genetic lines**.
